

Developing Interdisciplinary Medical Education for L&D Nurses on Labor Epidurals: A Quality Improvement Initiative

Brittany Duck Strickland BS, Blake Wiggins MD, Kim Langer MSN RN, Andrew Hackney MD, Teshi Kaushik MD
Obstetric Anesthesia, Department of Anesthesiology & Perioperative Medicine, UAB Heersink School of Medicine

BACKGROUND

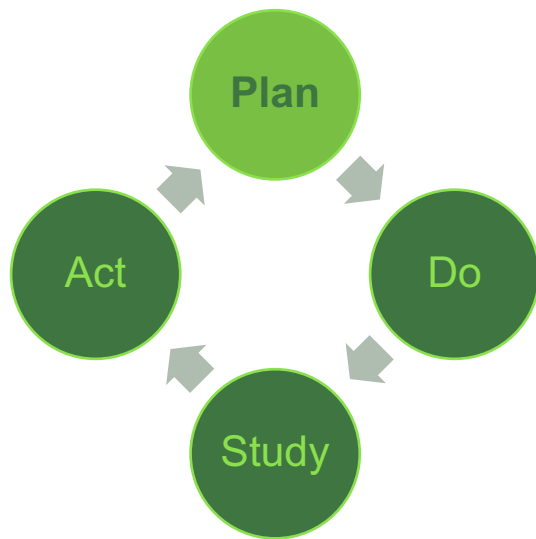

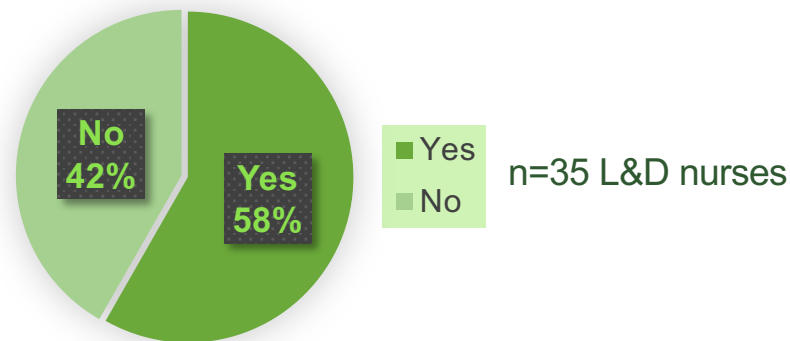

Figure 1: PDSA methodology used for quality improvement

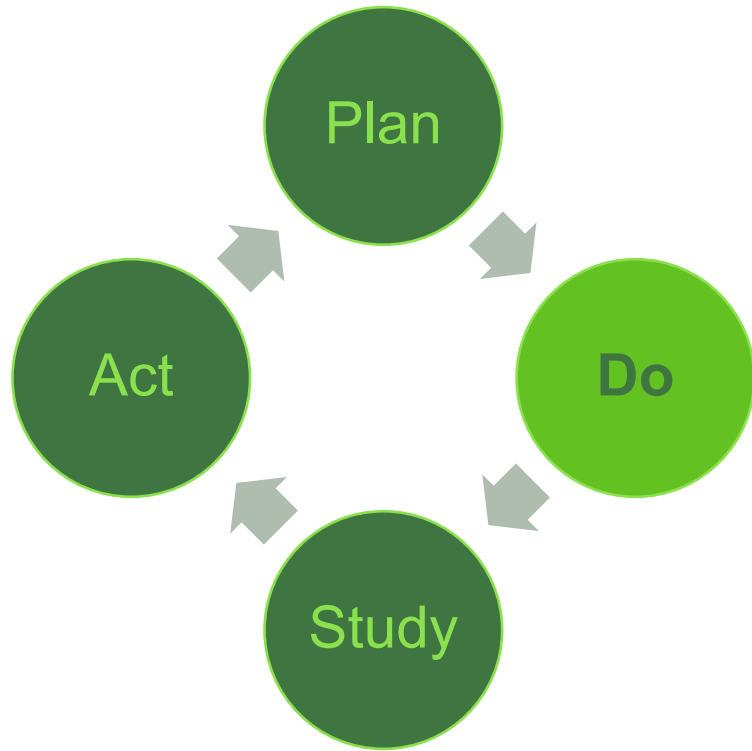

“Is there a need for education on labor epidurals?”

Survey of Anesthesia Residents:

- Identified communication barriers with L&D nurses regarding epidural management.

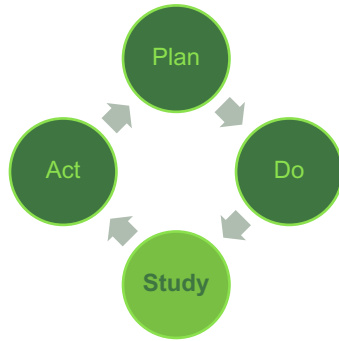

METHODS

Interdisciplinary Education
Modules on Labor Epidurals

Patient Directed Labor
Education Materials

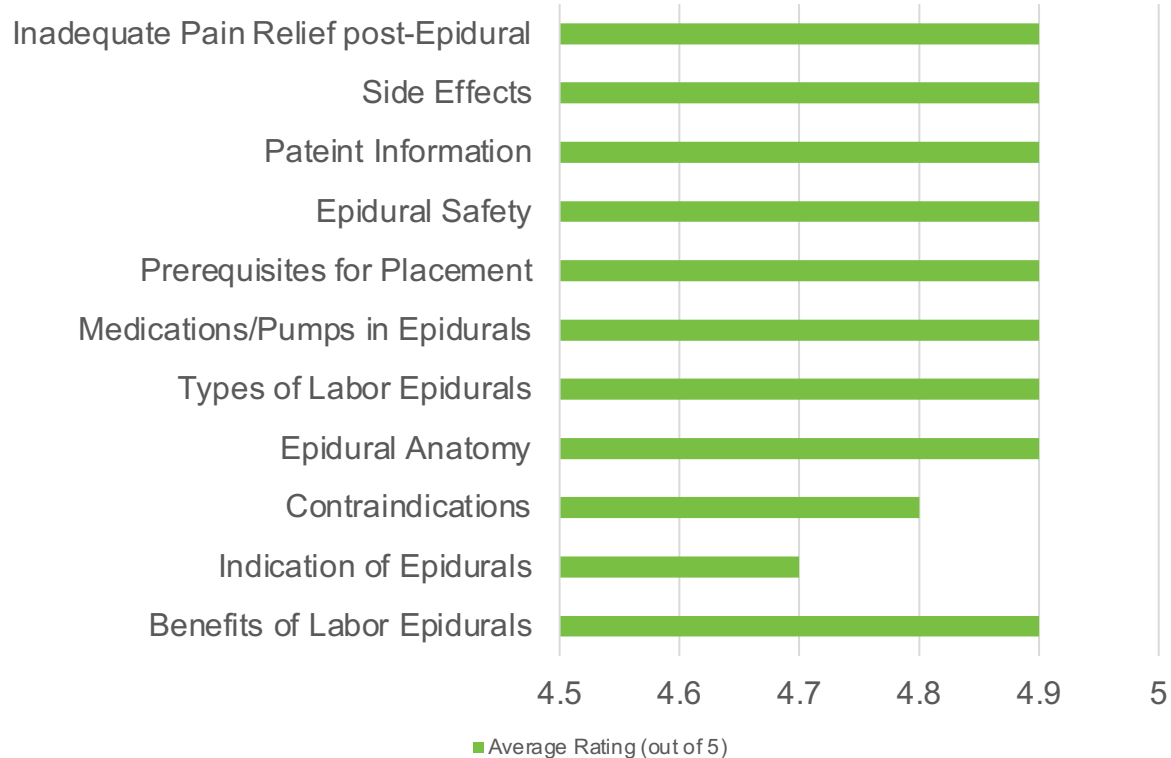

RESULTS: Post-Intervention Survey (n=30 nurses)

Ability to Enhance Job Performance

How well were objectives of the session met?

DISCUSSION

Barriers to
Interdisciplinary
Education

Challenges in
Interdisciplinary
Learning

Solutions that
enhance patient care
